WHY CHOOSE CAN-AM ACCESSORIES?

QUALITY & SEAMLESS INTEGRATION.

It's that simple. Our commitment to innovation, high-quality materials and seamless integration means no one is more qualified to create the accessories for our industry-leading ATVs and Side-by-Side vehicles. They fit in and fit right, look great, and are made to last. Only Can-Am accessories can truly make it your Can-Am.

TRUST & RELIABILITY.

Quality and confidence are built into everything we make, even our warranty. That's why off-road enthusiasts trust Can-Am accessories. It's a responsibility we take seriously, so you'll be pleased to know that genuine BRP parts, accessories and riding gear¹ are covered for 2 years² - no matter when they're purchased³. And if it's an aftermarket product and BRP or an authorized dealer sells it, it's also covered⁴! Add to that a 4-year limited warranty on helmets and it's clear: our commitment to quality and to you is rock solid.

In addition, our limited warranty comes with significant added value, because labor and collateral damage to the vehicle may be covered only if the failed part or accessory was installed by a BRP authorized dealer or distributor. We build them - we back them. Which is why for generations you've trusted us to get you there, and you know you can trust us to keep you going.

PERFORMANCE & PERSONALITY.

Can-Am. It's power, performance, freedom and versatility driven by unrivalled quality and reliability. Can-Am can quench your thirst for adventure and help get things done. Nothing beats our huge range of customized accessories designed to get the most out of every thrill, every mile, and every job.

CAN-AM

ADDS EVEN MORE

EXCITEMENT FOR 2017

In 2016, Can-Am's dealer network will feature Cyclops Gear's innovative, feature-packed CGX2 action camera.

The result is going to be pure adrenaline. It's big news for lovers you can now capture your memories in full action with your Cyclops Gear camera.

BRP and Lonestar Racing are teaming up to offer Can-Am Side-by-Side vehicle owners performance accessories with a distinctive racing-inspired look and feel. We're talking premium components designed to fit the outstanding Can-Am Maverick Side-by-Side vehicles. Aluminum roofs, bumpers, intrusion bars and much more, all exclusively for Can-Am, available in Can-Am Red, Octane Blue, and Manta Green.

Lonestar Racing are big believers in performance, and in Can-Am. In fact its president, Dan Fisher,

has chosen to race a kick-ass Can-Am Maverick X rs Turbo in the 2016 UTV World Championships. He obviously knows quality, and with Lonestar Racing accessories he knows how to get the most out of it.

The real winners are Can-Am Side-by-Side vehicle owners, who can begin equipping their rides by checking out Lonestar Racing accessories at their nearest Can-Am dealership.

Here's a bit of news you'll want to take sitting down... Beard, recognized as one of the leading aftermarket seat manufacturers, has developed, in concert with BRP, an exclusive seat package for both Maverick and Commander Side-by-Side vehicles.

Beard Seats True Performance Seating is slated to appear in 3 different Can-Am coordinated colors this year!

Sold in pairs, these innovative welded-steel frame seats are as stylish as they are rugged. Covered in sculpted foam, wrapped in a custom cover of marine-grade vinyl, they're the perfect touch for anyone looking to customize their ride.

OUTLANDER RENEGADE

APACHE 360 TRACK SYSTEMS

- Highly engineered track system provides ultimate traction in snow and any other type of ground surface for your Can-Am vehicle.
- Front track design reduces vibration, eases turning and enhances performance in any hard packed conditions.
- The angled front lugs minimize resistance, and the way the lugs overlap over the wheels ensures smooth rolling.
- The rear track pattern and lug height are balanced for greater traction.
- Unique adjustable contact patch enables you to tackle the toughest conditions year round.
- This new system has two settings: the user can choose a better attack angle in rough terrain or greater floatation in deep snow.

- Thanks to the heightened rubber over molded heavy-duty double bearing wheels and offset wheel spacing, friction and vibration are reduced to a minimum while ensuring reliability.
- Easy installation and quick conversion from tires to tracks once the Apache 360 Mounting Kit is installed (sold separately).
- The DPS[®] module, included in the Apache 360 Mounting Kit, optimizes your Dynamic Power Steering (DPS) performance, maximizing steering agility at lower speeds while providing firmer steering at cruising speeds. It also provides a speed correction factor for the speedometer.
- EC compliant.

100% MODULAR. IT'S YOUR CAB, YOUR WAY.

Can-Am's got a wide selection of components, so if you feel like designing your own cab, your own way, our modular system can make it happen. This is flexibility and versatility at work for you. Simply pick the windshield (p.90, doors (p.95), rear window (p.98) and roof (p.83) of your choice, and you're off. Whatever you choose to build your cab with, we guarantee the components will work together, because they were designed to work together.

APACHE 360 LT
MOUNTING KIT
COMING
THIS FALL!

DEFENDER MAVERICK COMMANDER

APACHE 360 LT TRACK SYSTEM

- Highly engineered track system provides ultimate traction in snow and any other type of ground surface for your Can-Am vehicle.
- Front track design reduces vibration, eases turning and enhances performance in any hard packed conditions. The angled front lugs minimize resistance, and the way the lugs overlap over the wheels ensures smooth rolling. The rear track pattern and lug height are balanced for greater traction.
- Unique adjustable contact patch enables you to tackle the toughest conditions year round. This new system has two settings: the user can choose a better attack angle in rough terrain or greater floatation in deep snow.
- Thanks to the heightened rubber over molded heavy-duty double bearing wheels and offset wheel spacing, friction and vibration are reduced to a minimum while ensuring reliability.
- Easy installation and quick conversion from tires to tracks once the Apache 360 LT Mounting Kit is installed (sold separately).
- The DPS module, included in the Apache 360 LT Mounting Kit, optimizes your Dynamic Power Steering (DPS) performance, maximizing steering agility at lower speeds while providing firmer steering at cruising speeds. It also provides a speed correction factor for the speedometer.
- Heavy-duty components ensure reliability and the design offers excellent acceleration, turning, braking and side-hilling performance.
- Larger contact patch than the Apache 360 Track System by 15 in² (97 cm²) at front and 41 in² (265 cm²) at back.
- Higher ground clearance than the Apache 360 Track System by 3/4" front and 1.25" rear.
- Higher rear angle of attack.
- Apache 360 LT Mounting Kit is required.
- EC compliant.

KNOW YOUR HELMET SAFETY RATINGS

Ever wonder what those certification labels on your helmet mean? They are safety standards based on street motorcycling.

DOT

DOT (Department of Transportation - FMVSS 218) This is a test that all road-going motorcycle helmets have to pass. Has been the same standard for more than 20 years.

Snell

SNELL M2015
SNELL is an independent testing organization, and certification is voluntary. SNELL is more rigorous than DOT, and its standards are updated every 5 years – the M2015 standards are the most recent. Continuous tests of production helmets are conducted to ensure compliance.

ECE22.05

ECE (Economic Commission for Europe) **22.05**
The safety standard most used worldwide, recognized in more than 50 countries and every race organization. Considered very up-to-date. 50 production helmets must pass testing before being certified and continuous tests of production helmets are conducted to ensure compliance.

WHICH IS BEST? They are all adequate for riding. SNELL and ECE are more rigorous, but typically reject features like modular designs. Meeting SNELL and ECE standards generally costs more, so expect to pay more for a helmet certified at that level.

MUST HAVE

CGX2 CAMERA

- 4K HD and 1080p at 60fps.
- 2" LCD display screen.
- Waterproof housing of up to 165 ft (50 m) underwater and the 2.4gh waterproof remote.
- Comes with 32gb micro SD card class 10 and 9 mounts.
- WIFI available to control your camera from your smart phone or tablet with the free iCyclops App for IOS and Android.

2866860090

CROSS HELMETS*

For warmer riding conditions and more active riding, you might want to opt for a cross helmet with goggles. In highly active riding where you will be sweating and breathing hard, goggles are the best solution for clear vision, and the extra open area will keep you from overheating.

BLACK INSULATION

Men's and ladies' Winter Riding Jackets and Highpants use PrimaLoft Black insulation to give you the right amount of warmth and extra breathability.

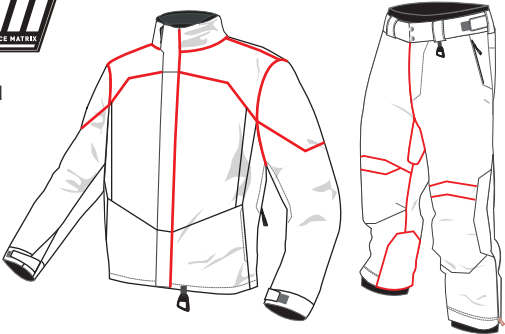

HIGH PERFORMANCE GEAR WITH RPM TECHNOLOGY

Developed by BRP for powersports riders like you, RPM provides maximum warmth no matter how tough the ride or how cold the environment.

WHAT’S UNDER THE SHELL COUNTS

To keep warm, you’ve got to keep dry. Our technical base and mid layers wick perspiration away from your skin, where it can evaporate quickly for all-day warmth.

HOW IT WORKS

Each layer has a function. You get the best performance and versatility when you dress in a system with base layer, mid layer and outer layer.

OUTER LAYER

Keeps wind and water out. Adds insulation for warmth.

MID LAYER

Dials in your warmth level. Add or remove during the day as conditions change.

BASE LAYER

Close to the body to wick perspiration and prevent chills. Adds warmth. Avoid cotton — it gets wet and stays wet.

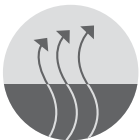

TECHNICAL FIBERS

X-STATIC
X-STATIC eliminates 99.9% of bacteria to prevent odors.

MERINO WOOL
Excellent at regulating body temperature, even when damp.

COCONUT FIBER
Natural material increases breathability by 40%.

BASE LAYER

MEN’S ACTIVE BASE LAYER

- X-STATIC¹ enhanced through to the fiber to thermodynamically regulate your temperature by conducting body heat out in warm weather and reflecting body heat back to the skin in cold weather.
 - Permanently treated for long-lasting antibacterial performance undiminished even after 250 washes.
 - Silver woven into fiber immediately binds with odor-causing agents such as ammonia and denatured proteins to instantly reduce odor.
 - Mesh panels in specific areas for better ventilation and accelerated drying.
 - Compressed for added comfort.
- 92% Polyester, 6% Spandex, 2% X-STATIC¹

HOW TO MEASURE

- For best results, have someone else take measurements.
- Measure body in underwear.
- Tape must be snug but not tight.
- If measurements fall between two sizes, order the larger size.

Chest/Bust: Measure under your arms, around the fullest part of your chest.

Waist: Measure around your natural waistline, keeping one finger between the tape and body.

Gloves: Measure palm width.

Inseam: Without shoes, from crotch to the floor.

Arm length: Hand on hip, from center back neck bone, along shoulder point round elbow to bottom of wrist bone.

Head: Around your head, from the center of the forehead, above the ears and over the natural bump at the back of the head.

WHAT CODE REPRESENTS YOUR SIZE?

1. Find your size.
2. The corresponding code is **THE CODE** you use to complete the part number on your order.
Example: 440227__90 Size: M = Code "06", therefore 4402270690

DRIVE BELTS

The drive belt is an integral part of your off-road vehicle's transmission and its importance for achieving its maximum performance can't be overstated. All the tuning or changes made in gearing, weights, ramps and springs in the world don't matter if the belt can't consistently maintain its performance.

SO, WHAT A MAKES A BELT STAND OUT?

You see that several elements include “Aramid.” Aramid is a man-made fiber resistant to heat and abrasion. It is used to add strength and long life to the rubber belt. Aramid fibers and fabrics are common in belts.

- ▶ Top Cog with Special Aramid Fiber

▶ Adhesion Rubber

▶ Specialized High Modulus Aramid Cord
- ▶ Compressive Rubber with High Modulus PBO Fiber

▶ Bottom Cog With Aramid Fabric

USE THE RIGHT BELT

Just as we calibrate our clutches and gearing to deliver the best possible performance for how a vehicle is ridden, we specialize the belt for the application, too.

Different types of riding create different heat and load conditions our engineers must account for. For instance, higher drivetrain loads, like on Maverick X ds Turbo, going through the dunes on the throttle hard for extended periods of time, generally require belts with a stiff construction and high heat resistance. A utility vehicle pulling equipment or heavily loaded sees high drivetrain loads too, but the clutch calibrations, engine RPM, vehicle speed and environment differ significantly – so will the required belt.

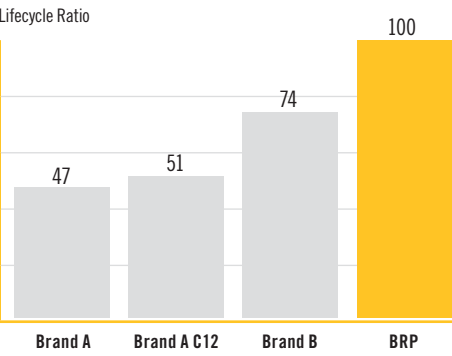

This is why it's best to match the exact model and year of your BRP vehicle to the replacement belt. And even though BRP belts might have the same width and length dimensions, the difference in the materials delivers the best performance and longevity for your vehicle's application and calibrations.

USING THE RIGHT OIL MATTERS

The right oil delivers:

THE BEST PERFORMANCE
THE BEST RELIABILITY
THE LONGEST LIFE

It’s a balancing act to deliver all three attributes – and only XPS, with its custom blend formulations and carefully matched additives, is specifically designed to do just that in a Rotax engine.

“The best oil is the oil that was specifically designed for the engine, without compromising the engine.”

Mischa Zimmermann
Project Leader Engine Development, BRP

DOES ONE OIL FIT ALL?

Our efficient, high-output engines place strong demands on engine oil. At BRP, we treat oil like an actual mechanical part that is developed concurrent with our latest high-performance engine technology.

XPS 4-STROKE OILS

Fact: XPS 4-stroke oils are BRP engineer-certified for unmatched lubrication, the right characteristics for our wet clutches, the right viscosities to best protect our engines from startup to operating temperatures, and they all have extra corrosion protection to better protect your engine.

WHY CHOOSE XPS 4-STROKE ENGINE OILS INSTEAD OF LOWER-COST ALTERNATIVES?

BRP engineers and experts like Mischa Zimmermann have proven repeatedly that other brands of oil don’t meet the high standards BRP desires for engines like the Rotax 4-Tec 1000 Turbo.

- Each vehicle manufacturer establishes their own lubrication standards and test criteria to validate OEM oil – this means XPS achieves a much higher standard.
- Even oil that is more expensive than XPS will not have the same custom-matched performance for Rotax engines.
- Our oil is tested on the whole lineup of vehicles and engines we manufacture – not just one or two models. Our specific testing includes real world test miles to ensure XPS meets our performance requirements as opposed to relying only on generalized, minimum specifications that most aftermarket oil brands use.

AREN’T THERE OTHER HIGH QUALITY OILS ON THE MARKET?

Yes. But no other oil is designed as an actual mechanical part during engine development like XPS. Your satisfaction matters.

XPS MAINTENANCE PRODUCTS

XPS SYNTHETIC GEAR OIL

- Exceeds API GL-5 specs and provides extra protection for a wide range of differential types.
- Formulated for extended drain intervals.
- Additional friction modifiers make it ideal for clutch-type limited slip differentials.
- Allows for higher load capacity, while providing better shear stability, and less oxidation than other synthetic or conventional gear oils.
- Superior thermal stability and relatively constant viscosity help fight wear and provide enhanced extreme-temperature performance.

XPS FUEL STABILIZER

- Extends fuel life by preventing fuel breakdown during storage.
- Helps prevent difficult starting, throttle hesitation and poor performance.
- Anti-corrosive, anti-oxidant formula protects fuel system and engine.
- Prevents problems inherent in Ethanol-blended fuels.

XPS SYNTHETIC SUPENSION GREASE

- Provides optimal lubrication at temperature extremes.
- Protects against external contamination.
- Specifically formulated for use in Can-Am off-road vehicles.
- Allows suspensions to perform regardless of conditions.
- 14 oz. (400 g).

XPS DOT 4 BRAKE FLUID

- Exceeds D.O.T 3 and 4 requirements.
- Unique low-moisture formulation providing maximum protection against vapor lock.
- Recommended in Can-Am off-road vehicles.

XPS PRE-MIXED ANTIFREEZE/COOLANT

- Pre-mixed, ready-to-use.
- Exceptional 5-year extended service life.
- Provides superior heat transfer, protection against corrosion and cavitation.
- Specifically formulated for use in your Can-Am vehicle.
- Ideal as a replacement coolant in vehicles that usually use 2-year antifreeze/coolant (green).

MORE THAN JUST OIL.

XPS OILS AND ROTAX ENGINES. CREATED, DEVELOPED, AND CONSTANTLY EVOLVING TOGETHER TO WORK BEST TOGETHER.

It's all about reaching optimum performance and protection, ensuring XPS oils have no equals when used in Rotax engines, and Rotax engines have no equals when they use XPS oils.

QUALITY, INNOVATION, RELIABILITY AND PERFORMANCE GO INTO EVERY BRP VEHICLE AND INTO EVERY DROP OF XPS OIL.

Our performance requirements exceed oil certification standards, so we set our own: Testing, and retesting our oils in every Rotax engine type under a wide range of rigorous operating conditions to make sure they work the best under all conditions.

XPS IS THE ONLY OIL SPECIFICALLY ENGINEERED FOR ROTAX ENGINES.

BRP's Rotax engines are the perfect embodiment of power and technology, and only highly specialized, specially engineered XPS oils can ensure they always operate at their maximum efficiency and potential.

XPS OILS & ROTAX ENGINES. PARTNERS IN PERFORMANCE.
